

Get The Preheat System That Runs On ALL Cylinders.

Preheating improves safety and extends the life of your expensive engine by reducing damage caused by cold starts.

Why is ours the top system on the market?

- **No cylinders left unheated...** no CHT conflicts
- **Non-invasive...** no engine bolts replaced with hollow bolt heaters.
- **Best durability...** e.g. aluminum sump heater, not silicone pads.
- **Best price ...** why pay 40% more, 140% on parts?
- **Best warranty...** 5 years, not 3.

FAA-PMA APPROVED
US Patent 6,232,577

Long engine life starts with Reiff.
